

Grand Lake Health System is proud to offer 3-D Mammography!

Experience 3-D Mammography at Joint Township District Memorial Hospital. This exceptional mammogram experience promotes a sense of calm, with elegant lighting and gentle rounded shape. This platform puts everyone in a better position for effective care.

Physician's order is not necessary when the following criteria is met:

- Age 40 or older
- No current signs or symptoms of breast disease
- No personal previous history of breast cancer
- No breast implants

To schedule your appointment, please call
JTDMH Central Scheduling at 419-394-9599

GRAND LAKE[™]
HEALTH SYSTEM

Managing your health, your way.

The Women's Imaging Center at Joint Township District Memorial Hospital offers a self-request mammography screening program.

Women who meet screening criteria may now schedule a mammography screening at the Women's Imaging Center without an order from their doctor.

Used as a wellness tool, the goal of our self-request mammography screening program is to guard your health and provide you easier access to testing that can detect breast cancer in its earliest form, thus increasing your chances of survival should cancer be found.

Whether you have a current physician or not, you can call and schedule your mammography screening appointment. The self-request mammography screening is covered by most insurance plans.

Eligibility requirements:

To qualify for the self-request mammography screening program, you must meet all of the following criteria:

- Female 40 years of age or older at the time of the screening
- Asymptomatic (have no current breast complaints)
- No personal history of breast cancer
- No breast implants

To schedule your screening, call us at 419-394-9599

A mammography screening is just one important way to achieve early detection of breast cancer. Equally important, however, are yearly scheduled clinical breast exams performed by your healthcare provider, as well as monthly breast exams that you perform at home.
